

Metal Finishing Index to Volume 79 January—December, 1981

Compiled by S. Langdon, I. Oquendo and P.A. Frost

In this index, all material that appeared in the January through December 1981 issues of Metal Finishing is listed according to subject matter, with cross-references where required.

A letter will be found following each listing indicating the manner in which the material was published, as follows: (S)—Shop Problem, (R)—Recent Development, (M)—Manufacturers' Literature,

(B)—Book, (P)—Patent. References not followed by a letter were feature articles. The numbers in the right-hand column refer to the month and page: 6-85—June issue, page 85.
